Contents

Preface 1
Annex *'Standardized' description of some experimental plots in the* Quercus ilex *L. ecosystems* 3

Part A: Biogeography and history
Reille, M. & A. Pons, The ecological significance of sclerophyllous oak forests in the western part of the Mediterranean basin: a note on pollen analytical data 13
Barbero, M., R. Loisel & P. Quézel, Biogeography, ecology and history of Mediterranean *Quercus ilex* ecosystems 19
Barberis, G., S. Peccenini & G. Paola, Notes on *Quercus ilex* L. in Liguria (NW Italy) 35

Part B: Structure, productivity and dynamics
Lledó, M. J., J. R. Sánchez, J. Bellot, J. Boronat, J. J. Ibañez & A. Escarré, Structure, biomass and production of a resprouted holm-oak (*Quercus ilex* L.) forest in NE Spain 51
Cartan-Son, M., C. Floret, M. J. Galan, M. Grandjanny, E. Le Floc'h, M. Maistre, P. Perret & F. Romane, Factors affecting radial growth of *Quercus ilex* L. in a coppice stand in southern France 61
Bellot, J., J. R. Sánchez, M. J. Lledó, P. Martínez & A. Escarré, Litterfall as a measure of primary production in Mediterranean holm-oak forest 69
Khatouri, M., Growth and yield of young *Quercus ilex* coppice stands in the Tafferte forest (Morocco) 77
De Lillis, M. & A. Fontanella, Comparative phenology and growth in different species of the Mediterranean maquis of central Italy 83
Floret, C., M. J. Galan, E. Le Floc'h & F. Romane, Dynamics of holm oak (*Quercus ilex* L.) coppices after clearcutting in southern France *Flora and life cycles changes* 97
Michaud, H., R. Lumaret & F. Romane, Variation in the genetic structure and reproductive biology of holm oak populations 107
Elena-Rossello, J. A., R. Lumaret, E. Cabrera & H. Michaud, Evidence for hybridization between sympatric holm-oak and cork-oak in Spain based on diagnostic enzyme markers 115
López, F., J. M. Serrano & F. J. Acosta, Temperature-vegetation structure interaction: the effect on the activity of the ant *Messor barbarus* (L.) 119
Blondel, J., P. Isenmann, M. Maistre & P. Perret, What are the consequences of being a downy oak *(Quercus pubescens)* or a holm oak (*Q. ilex*) for breeding blue tits (*Parus caeruleus*)? 129

Part C: Water relationships
Terradas, J. & R. Savé, The influence of summer and winter stress and water relationships on the distribution of *Quercus ilex* L. 137
Rambal, S., *Quercus ilex* facing water stress: a functional equilibrium hypothesis 147
Gratani, L., P. Marzi & M. F. Crescente, Morphological adaptions of *Quercus ilex* leaves in the Castelporziano forest 155
Pitacco, A., N. Gallinaro & C. Giulivo, Evaluation of actual evapotranspiration of a *Quercus ilex* L. stand by the Bowen Ratio-Energy Budget method 163
Piñol, J., A. Avila, A. Escarré, M. J. Lledó & F. Rodà, Comparison of the hydrological characteristics of three small experimental holm oak forested catchments in NE Spain in relation to larger areas 169
Acherar, M. & S. Rambal, Comparative water relations of four Mediterranean oak species 177
Duhme, F. & T. M. Hinckley, Daily and seasonal variation in water relations of macchia shrubs and trees in France (Montpellier) and Turkey (Antalya) 185
Oliveira, G., O. A. Correia, M. A. Martins-Loução & F. M. Catarino, Water relations of cork-oak (*Quercus suber* L.) under natural conditions 199

Part D: Nutrient cycling and budget

Mayor, X. & F. Rodà, Is primary production in holm oak forests nutrient limited? *A correlational approach* 209
Leonardi, S., M. Rapp & A. Denes, Organic matter distribution and fluxes within a holm oak (*Quercus ilex* L.) stand in the Etna volcano *A synthesis* 219
Escudero, A., J. M. Del Arco & M. V. Garrido, The efficiency of nitrogen retranslocation from leaf biomass in *Quercus ilex* ecosystems 225
Ferran, A. & V. R. Vallejo, Litter dynamics in post-fire successional forests of *Quercus ilex* 239
Bonilla, D. & F. Rodà, Soil nitrogen dynamics in a holm oak forest 247
Hernández, I., J. F. Gallardo, I. Santa Regina & C. Quilchano, Decomposition rate of *Quercus rotundifolia* leaves in an evergreen oak forest of the Duero Basin (Province of Zamora, Spain) 259
Rapp, M., F. Ed Derfoufi & A. Blanchard, Productivity and nutrient uptake in a holm oak (*Quercus ilex* L.) stand and during regeneration after clearcut 263
Canadell, J. & M. Vilà, Variation in tissue element concentrations in *Quercus ilex* L. over a range of different soils 273
Sabaté, S., S. Calvet & C. A. Gracia, Preliminary results of a fertilization-irrigation experiment in a *Quercus ilex* L. forest in relation to leaves and twigs characteristics 283
Bertrand, M. & J. P. Lumaret, The role of Diplopoda litter grazing activity recycling processes in a Mediterranean climate 289

Part E: Management

Huntsinger, L. & J. W. Bartolome, Ecological dynamics of *Quercus* dominated woodlands in California and southern Spain: a state-transition model 299
Bellon, S. & G. Guérin, Old holm oak coppices... new sylvopastoral practices 307
Cuartas, P. & R. García-Gónzalez, *Quercus ilex* browse utilization by Caprini in Sierra de Cazorla and Segura (Spain) 317
Giovannini, G., D. Perulli, P. Piussi & F. Salbitano, Ecology of vegetative regeneration after coppicing in *macchia* stands in central Italy 331
Gómez-Sal, A., M. A. Rodríguez & J. M. De Miguel, Matter transfer and land use by cattle in a dehesa ecosystem of central Spain 345
Retana, J., M. Riba, C. Castell & J. M. Espelta, Regeneration by sprouting of holm oak (*Quercus ilex*) stands exploited by selection thinning 355
Ducrey, M. & J. Toth, Effect of cleaning and thinning on height growth and girth increment in holm oak coppices (*Quercus ilex* L.) 365
